Die verlorene Sammlung der chassidischen Gemeinde
von Karlin-Stolin (Wolhynien und Belarus)

Abstract: The Karlin-Stolin Hassidic community is one of the oldest Hassidic groups, tracing its roots back to the very beginning of Hasidism. This community had an extensive manuscript and book collection of enormous scholarly and religious importance. According to several witnesses this collection was confiscated by the Gestapo after the occupation of Stolin (Belarus). Now, more than sixty years after the disappearance of this collection, we are asking the help of the scholarly community in our attempt to find this lost treasure.
